Tutorials:

To help you work with our Low Poly assets even more efficiently, we've prepared a series of tutorial videos on Unity, Blender, and Godot:

We offer additional services:

- **Customization & Model Creation**
We can adjust up to 3 models for free (if they're not too complex).
For larger requests, we offer custom modeling service.
- **Machine Learning (ML) License**
We provide dedicated ML licenses that allow data usage for neural networks and synthetic datasets.
- **NFT / Blockchain License**
If you'd like to use our assets in NFT projects or blockchain-based applications, we can provide an extended NFT license for commercial rights and tokenization.
- **Full Library License (25,000+ Assets)**
We offer a special license for our entire library of 25,000+ models -
with a significant discount compared to purchasing individual packs.

Interested?

Just contact us at support@ithappystudios.com - we'll be happy to discuss your needs.

License Information

This product is covered by the [Superhive Standard Royalty Free](#) License.

Additional usage restrictions apply - see the included **LICENSE.txt** file for full details.
